Pinwheel Template

Color, cut, and spin

Big dot in the middle: stop cutting here. Small dots: poke a hole for the pin.

1. Color the square and cut it out. Cut along each dashed line and stop at the big middle dot.
2. Bend every corner that has a small dot into the middle. Do not crease the paper.
3. A grown-up pushes a pin through all the dots and the center into a pencil eraser.
